DESIGN FOR THE PEOPLE

Collection 2020

Bønnelycke mdd *Maria Berntsen* *Antonio Sena*

Bjørn+Balle *Carlo Wolf*

Designed by Danes

Design For The People is rooted in the Danish design tradition, where aesthetics, simplicity and function are keywords. Together with contemporary Danish designers we strive, collection by collection, to give you the best design and most functional light, with new perspectives on the Danish design tradition. We aim to create timeless lighting that you will value more and more as time goes by. That does not mean, however, that we ignore the current movements in the design scene. Quite contrary, we want to embrace them and intemperate them to fit into our own design universe.

We want our designs to be the fruits of innovative thinking that enhance our lives and the spaces surrounding us. Creating a comforting feel and ambience in your home, where you want to live and spend time.

For the 2020 collection we focus on high quality materials such as marble, opal glass and brass. We focus on the quality of light and how to make it adjustable to everyday situations. Furthermore, we have extended some of our novelties from 2019 to cover a complete family. Well-known designs from previous collections have been upgraded with new and improved details and surfaces, and some you will see in new colors.

Beautiful and well-made design has led Design For The People to where we are today. The cooperation with talented designers and our drive throughout the whole design process, is crucial for us to keep focus on creating good design and innovative solutions. Our goal is to have the right balance between timeless design and modern technology.

Danish design has received great recognition throughout the world.
We have also been a part of that acclaim, and we have been honored with several recognized international design awards.
This year we have won two of the much-coveted Red Dot Design Awards 2020 for Stay table and wall, designed by Maria Berntsen.

Enjoy and be inspired by the 2020 collection

Red Dot Design Award

Stay Table & Stay Wall
Red Dot Award Winner 2020

The Red Dot Award is one of the most recognized international design contests in the world and has been a quality stamp in the design industry since 1955.

Each year, Red Dot receives more than 17,000 entries from close to 60 countries, which will subsequently be reviewed and judged by a jury of 40 independent design experts.

The price is divided into three categories: Product Design, Design Concept and Communication Design. Red Dot is organized by Design Zentrum North Rhine Westphalia in Essen, Germany.

Won't you stay with me?

Stay Table & Stay Wall
Red Dot Award Winner 2020

"My idea was to create a timeless lamp series that could be included in the modern home. It was to include our contemporary LED technology with the option to dim the light, thus providing the perfect lighting for working/reading or a cosy coffee on the sofa," designer Maria Berntsen.

The lamp has several gorgeous qualities, including the lampshade's flexible swivel mechanism, which allows for a directional light to create optimal lighting conditions. The Noriing design of the Stay wall lamp, which has an integrated table, makes the lamp an exciting alternative to a traditional wall lamp.

Common to both the table and wall lamp is their great functional value, as the lamp's base has an integrated charger station with USB access, and a beautiful and discreet on/off touch function that can also dim the lights.

Bønnelycke mdd

Unconventional architect with no whims and fancies
Based in Aarhus, Denmark

Bønnelycke Mdd was established in 1988. Driven by a nosurpressable urge and desire to work constructively and innovatively, Bønnelycke mdd started his career with the design of lamps, furniture and interior decorating. Quickly, he became known as an unconventional architect with no whims and fancies. His ability to challenge and optimize the manufacturing process itself is to be found in Henrik's original professional background as a toolmaker.
"It could be fun" and "of course it can be done" – are phrases often used in his company.

From day one, the core of his work has been to create products simply because they are needed. Designs by Bønnelycke Mdd grow out of a specific need or requirement expressed by the customer – and by the general public as such. This has resulted in a comprehensive portfolio of projects and designs allowing the company to slowly but steadily expand over the years.

Raito Pendant, Opal white & brass by Bønnelycke mdd
Raito Table, Opal white & brass by Bønnelycke mdd
Raito Wall, Opal white & brass by Bønnelycke mdd

Raito

Raito is a modern, timeless and extremely beautiful series of designer lamps where simplicity and elegance merge in the best possible way.

The design in opal glass gives the series a pleasant, light surface and a soft, diffuse light that is glare-free and undisturbed. Raito contributes to the current design trends in lighting, where the socket and the assembly are made up by flat, rounded brass details.

Raito Pendant 30 oval, Opal white & brass by Bønnelycke mdd

Moku

Moku is designed by Bønnelycke mdd and is a pendant lamp with a modern look that stems from the beautiful, natural materials: metal and wood. The design has been created to provide a glare-free light. The name is connected to the wooden fixture, included in two different designs for a personal expression. For a simple and pure expression, the wooden fixture can be omitted.

Moku Pendant, Black & wood by Bønnelycke mdd
Moku Pendant, White & wood by Bønnelycke mdd

Fura

The stylish design gives Fura, which is designed by Danish architect Bønnelycke mdd, a minimalistic and modern expression, to which the opal bottom shade lends a beautifully diffused light.

The bottom shade is slightly recessed and covers the latest integrated LED technology, with dim-to-warm, which gives a tasteful design.

Fura 25 Pendant, White by Bønnelycke mdd

MIB Ceiling, Black by Bønnelycke mdd
MIB Ceiling, White by Bønnelycke mdd

MIB

The MIB series has been extended with an elegant and minimalist spot for ceiling mounting. The spot has been developed to be mounted directly over the power outlet in the ceiling. Therefore, there is no on/off on the lamp – this is controlled by your switch in the wall. The sleek and adjustable lamp head can be directed to where you need the light. The beautiful and simple design gives a minimalist expression and will fit into many styles and interior settings.

Learn more about MIB on p96

Irresistible grey

The minimalist MIB series is steeped in Nordic elegance and boasts excellent usability. MIB invites you to put a spotlight on life. The slender and adjustable lamp head emits a precise and directional light.

MIB Table, Grey by Bønnelycke mdd
MIB Floor, Grey by Bønnelycke mdd

SpaceB

Space B realises the desire to create an extremely simple lamp in terms of expression.
The simple and current design is given a particular twist of pleasant lighting through three different settings for temperature and brightness. An illuminating surprise element which sets new standards for innovative lighting and contributes great functional value. The sculptural floor lamp can be tilted to all sides, and if you place it so that it shines its light against the wall, a decoration of light appears on the wall – particularly visual if you place several lights side by side, tilt them in different directions and choose different colour temperatures.

Artist 25 Pendant, Beige by Bønnelycke mdd
Artist 40 Pendant, Beige by Bønnelycke mdd

Artist

With its contemporary design and simple shape, the award-winning Artist is a beautiful candidate for a future classic. The build-in LED panel is covered with a opalized shade, which soften and defuse the light. As the name suggests, the design is inspired from the world of music – by a drum kit cymbal.

Nexus 2.0

NEXUS 2.0 is an exciting series that epitomises Nordic cool. We are relaunching the series in black and white with a new silky matte surface. The details tell the story of a light with an opulent design, for example, the toggle switch in the best retro style, the elegant rotatable joint in solid brass and the pendant's invisible transition between shade and cord.

Learn more about Nexus 2.0 on p92

Nexus 2.0 Floor, Black by Bønnelycke mdd
Nexus 2.0 Pendant 10, Black by Bønnelycke mdd

Nexus 2.0 Pendant 20, White by Bønnelycke mdd
Nexus 2.0 Wall, White by Bønnelycke mdd
Nexus 2.0 Table, White by Bønnelycke mdd

Sometimes an evergreen needs an update, and that is what we have given the Nexus series. The on/off switch is now stronger and in brushed brass to match the joint, the wall lamp has a moulded bracket and the surface of the whole series is now satin soft.

Belly

The relationship between Nordic and Japanese design is a close one. Both schools display an affection for simplicity of expression and honest materials. In giving shape to the Belly pendant, Bønnelycke Mdd drew inspiration from the traditional, Japanese teapot. A closer look also reveals clear references to the cast-iron stove or the archetypal jingle bell. With its dominantly artisanal look, Belly combines weightiness of shape with lightness of suspension.

Maria Berntsen

Holds degrees from both The Royal Danish Academy Art and L'Ecole d'Architecture
Based in Copenhagen, Denmark

With her own design studio in Copenhagen, Maria Berntsen has since 1992 focused on architecture and design. Maria Berntsen is a well-established name in the design industry and has over the years collaborated with a wide range of Danish and international companies, where her extensive experience has resulted in many successful designs.

"At the start of a new project, I look for an idea with nerve, functionality and identity. By modelling and visualizing, I test the idea, how it might be used, and its presence.

Good design communicates and establishes a dialogue with the receiver. Design is not just about functionality – it is as much about the emotional connection and impact. To me, success is when my design brings joy in the everyday lives of people"

Maria Berntsen
Owner and designer

Visit Maria Berntsen in her studio ›

Stay

Stay is designed by Maria Berntsen and is an exciting alternative to the classic wall lamp, with its functional and Noriing design resulting in special and beautiful lighting. The lamp has a high functional value, as the plate acts as an organising table and charging station via USB access, while the lampshade can be rotated. The lamp is available with built-in LED, where a small, delicate detail is the switch function which is integrated in the plate itself.

Angle Pendant, Black by Maria Berntsen
Angle Pendant, White by Maria Berntsen

Angle

Angle is exclusive lighting with an industrial look, designed by Maria Berntsen.
The special feature of this lamp is the ability to determine the direction of the light via the magnet mounted on the wire. The lamp looks good in clusters of several units which are angled differently.
It creates a gorgeous expression and adds a bit of ambience to any room.

Learn more about Angle on p104

Glossy

Glossy is the epitome of tasteful and sophisticated design. The Danish designer, Maria Berntsen, has created a table lamp that oozes of Nordic minimalism, and where the combination of the exclusive materials, marble, brass and opal white glass contribute to an incredibly elegant design. Glossy is named after the shiny surface of the opal white glass, which lets a soft and comfortable light shine through.

Bjørn + Balle

Design is a part of our identity
Based in Copenhagen, Denmark

Visit Bjørn + Balle in their studio ›

The designers combine minimalistic Scandinavian design with international trends. It's about image creation and recognizability. The overall identity of the product is its form, function, details, structure and materials, which all comes together. A product never stands alone but is part of an environment where the story being told supports the design.

BJØRN + BALLE have both carried out a large number of design tasks for both national and international clients at many different areas, such as product design, furniture design, interior design, identity programs and exhibitions, and together they have great success with lighting design.

BJØRN + BALLE has delivered a wide range of innovative technical solutions for the industry, as well as beautifully designed products for the consumer market.

Sway Floor, Black by Bjørn + Balle
Sway Table, Black by Bjørn + Balle
Sway 11 & 15 Pendant, Black by Bjørn + Balle

Come sway with me

Sway is designed by the Danish design duo Bjørn + Balle and is extremely beautiful in its simplicity. The minimalist design reflects the designer's sharp eye for tasteful lighting, where every detail has been carefully considered.

The light is reflected both up and down, giving a soft and pleasant light. At the same time, the lamp's flexible swivel mechanism allows for a directional light that contributes optimal light conditions. A timeless lamp that can create joy for many years has been created.

Strap

Metal and leather go well with the light Nordic style. The combination of these materials allows the light to visually interact with a modern interior, where combining materials is one of the biggest trends. With Strap it seems obvious – just as obvious as how a Nordic light design is named after a leather strap. The narrow and elegant leather gives Strap a warm and raw look, balancing a classic and the industrial expression. It comes with two leather straps in brown and black respectively, so it's up to you to give the Strap its final look.

Nori

Nori is a family that stands together without being inseparable. Lines, shapes, and surfaces are harmonic, furnishing all of the designs with an unmistakable ease. The design is erect in stature, and is refined in its exclusive FSC certified oiled walnut top in one of the hallmarks of the Nori collection.
It fits easily into a range of interior design contexts – with smart looks in a mix of colours and sizes.

BIM & projects

You can download Revit, AutoCAD & ArchiCAD files,
which are some of the most used file types

After great demand and daily requests from our customers,
we are now ready to offer you a new service.

BIM Objects is the preferred go-to database for architects,
project managers, interior designers and others around the
world when building and decorating various projects.

Now you can download 3D-files of a selection of our lamps,
enriched with product data, providing you with better
opportunities to plan and design our lamps into the
constructions. The product range will continuously
be extended.

We know that a 3D-file is not just a 3D-file. There is a wide
variety of formats and versions of BIM-files, and different
industries use different versions.

Arla Unika

In the Arla Unika stores, the Bønnelycke mdd has used the lamps Artist & MIB from the Design For The People collection. The Artist pendant are used above the counter, where it is especially important for the customers to see the product clearly and in a nice warm light.
Likewise, several low-hanging Artist pendants are mounted above the long table for sampling contribute to a good light and intimate atmosphere with the large illuminated surface.

On the shelf with delicacies, the goods are wrapped in paper and therefore, the same bright light as at the counter is not necessary. Therefore, the MIB spotlight is used to create a combination of 'hot-spots', indirect light and shadows.

The following Design For The People products are utilized in the project: Artist 25 & 40 in cobber & MIB 6 spotlight.

Moku, Black by Bønnelycke mdd,
FSC certified wood top

FSC & responsibility

We design and manufacture lighting with great knowledge of, and consideration for, how light affects us humans and our wellbeing. It is an essential part of our product development. With manufacturing and product development also comes responsibility – a responsibility to protect the resources we have available, and the people we work with.

At the immediate level, this mainly concerns investing in continuous improvement, including our product development. By focusing on low prices, we commit ourselves to looking at new, simple solutions and processes that use less material, as well as long-life technology. Basically, this means that we take into account many more elements than just that a design should be nice to look at. We assess whether a design can be made more appropriate and less costly through small adjustments. For example, it makes sense for the installation of our lamps to be as simple as possible, ensuring that no additional resources are required for installation. That is why we have more than 60 dedicated engineers, each with more than 10 years of experience in lighting technology, in our development department, all constantly working with this focus.

We are at the forefront when it comes to the development of energy-saving LED technology. You no longer need to compromise between the desire for a warm, pleasant light, innovative design, and the desire to keep power consumption down. Development in this area moves quickly, and new solutions and processes are constantly emerging, making it possible to combine aesthetics with greener technology.

FSC

We focus on protecting our resources and the environment. This is one of the reasons why we have been FSC certified since 2016. FSC certification is about using trade forest products such as wood and paper from responsible sources, and ensuring clear traceability for the wood – all the way from forest to the finished product in the shop. Responsible sources refers to local populations, animals and plant life being taken into consideration, that logging is done in an environmentally appropriate way and that the deforested areas are replanted. The desire and motivation for FSC certification of the products which include wood is a natural continuation and development of our approach to environment and sustainability – and we will continue to demand FSC certified wood for those of our design products that include wood.

We see sustainability as a task involving everyone associated with Nordlux – from the owners, board and management to employees and suppliers.

***FSC® stands for Forest Stewardship Council® and is a recognised international non-profit labelling scheme for wood and paper.**
FSC certification ensures responsible forest management and improved living conditions for the local population in forests worldwide.

IP code

Safety and water
protection classification.

Nordlux uses the IP code system to explain how well suited products are for humid environments, such as bathroom and outdoors.

The IP code is an international standard, that classifies and rates the degree of protection against intrusion, dust, accidental contact and water.

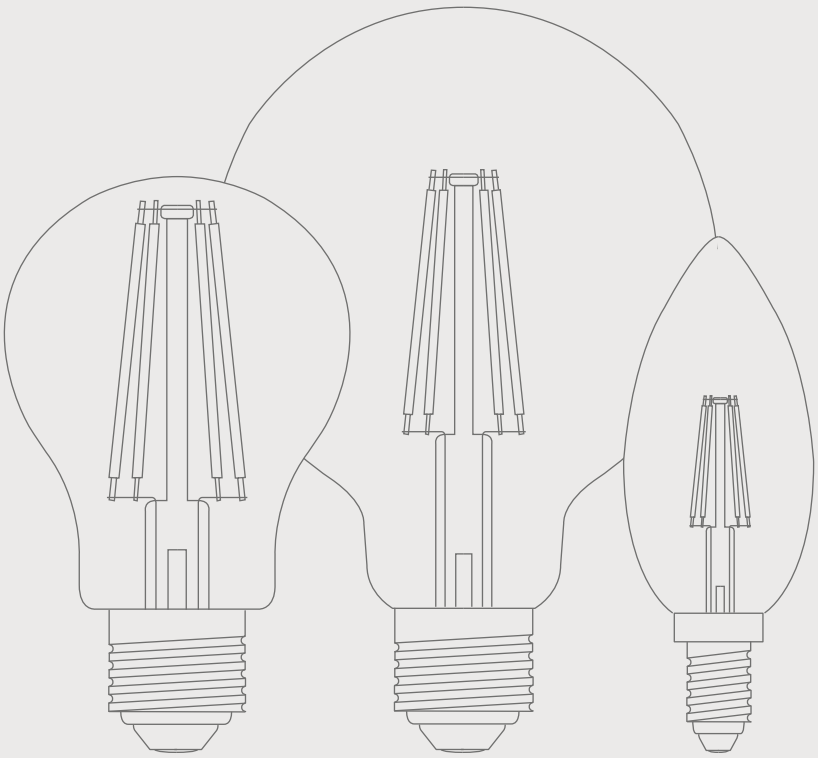

IP consists of two digits. First digit explains effectiveness against intrusion of objects. It important to protect electronics against contact with hands and fingers and Nordlux's product adhere to all the legal standards for this, typically level 2. We even offer product that are completely protected against dust – that would be level 6. Second digit explains the degree of water protection. 0 being no protection and 5 meaning protected against water jet from all directions.

	Intrusion protection	Water protection
Degree and protection	0 Not protected	0 Not protected
Protected against	1 Solid objects larger than 50 mm	1 Vertically dripping water
Protected against	2 Solid objects larger than 12 mm	2 Vertically dripping water at an inclination of 15˚ degrees
Protected against	3 Solid objects larger than 2,5 mm	3 Splashes of water at an angle of up to 60˚ degress
Protected against	4 Solid objects larger than 1,0 mm	4 Sprinkling of water
	5 Dust protected	5 Protected against water jets
	6 Dust-proof	6 Protected against strong waves
		7 Protected against the effects of temporary immersion in water

Nuru Table, Rosegold by Bønnelycke mdd,
IP 44 - for indoor & outdoor use

Light source info

Kelvin

(K) is the colour temperature of the light source- the higher number the colder light.
3000 K = warm white
4000 K = neutral white

Lumen

(lm) is the measurement unit for louminous flux.Louminous flux is the total amount of light that the light source submits.

RA

is the colour rendering that the light source provides.

GB - The LED technology is constantly undergoing major development which contributes to continuous arrival of new and better LED bulbs on the market. Nordlux always strives to deliver the latest LED technology to our customers, which is why when purchasing lighting or bulbs, the new bulbs can seem different, with improved colour/light output/design.
*For additional bulb info please go to www.nordlux.com.

SE - LED är fortfarande under en betydande utvecklingsprocess, som bidrar till att det i snabb takt kommer nya och bättre LED lampor på marknaden. Nordlux strävar efter att leverera den senaste LED-tekniken till sina kunder, därför kan man vid återköp eller vid köp av nya lampor uppleva att de nya lamporna har en annorlunda och förbättrad färg/ljusflöde/utformning.
*För ytterligare information angående ljuskälla vänligen gå till www.nordlux.com

DE - LED unterliegt ständig einem bedeutenden Entwicklungsprozess, durch den mit großer Geschwindigkeit neue und bessere LED-Lampen auf den Markt kommen. Nordlux ist bestrebt, Ihren Kunden immer die neueste LED-Technik anzubieten, wodurch man beim Neukauf von Leuchten und Nachkauf von Leuchtmitteln erleben kann, dass die neuen Leuchtmittel eine andere und verbesserte Farbe, Lichtausbeute und Form haben.
*Für weitere Informationen gehen Sie bitte zu Leuchtmittel www.nordlux.com.

DK - LED er til stadighed under en betydelig udviklingsproces, som bevirker, at der med stor hyppighed kommer nye og bedre LED pærer på markedet. Nordlux bestræber sig på altid at levere den nyeste LED teknik til vores kunder, hvorfor man ved genkøb af lamper og ved tilkøb af pærer kan opleve, at de nye pærer har anderledes og forbedret farve/lysudbytte/udformning.
*For supplerende pæreoplysninger gå venligst til www.nordlux.com

FR - LED est constamment en développement important, ce qui a pour effet d'amener très fréquemment de nouvelles ampoules LED améliorées sur le marché. Nordlux s'efforce de toujours fournir la dernière technologie LED à nos clients ; c'est pourquoi, lorsque vous rachetez des lampes et acquérez des ampoules, vous pouvez trouver que les nouvelles ampoules ont une couleur/une sortie de lumière/un design différents et améliorés.
*Pour plus d'informations concernant l'ampoule merci de visiter www.nordlux.com.

BX - De Led technologie ondergaat een continue verbetering die bijdraagt tot nieuwe generaties LED lampen. Nordlux streeft ernaar die nieuwste technologie aan te bieden aan zijn klanten.
De verbeterde technologie zorgt voor kleine veranderingen in de verlichtingsarmaturen en lampen ten voordele van een verbeterde lichtopbrengst, verbeterde kleur-echtheid en design.
*For additional bulb info please go to www.nordlux.com.
